ABSTRACT OF THE DISCLOSURE:

---

This new system of playing a card game for monetary gain, starts with a dealer shuffling a standard 52 card deck of playing cards, the player places a single bet, the dealer then deals a single card face up to the player, (or players, up to six) than deals a single card face up to himself, value is assigned to the suites of cards, diamonds being the highest value, hearts being the next highest value, spades being the next highest value and clubs being the lowest value, if both the player and the dealer receive the same suite card the highest numeric value will win, the player is paid even money for his bet, if the player receives the ace of diamonds and the dealer has a diamond the player is paid three times his bet.
